

AIDAH DZULFADILAH SUWARDI

Fullstack Developer

089613732611 | aidahdzulfadilah.work@gmail.com | Makassar, South Sulawesi, Indonesia

[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Informatics Engineering graduate from Hasanuddin University (GPA 3.70/4.00) specializing in fullstack web development. Proficient in building end-to-end web applications using React.js, Next.js, and TypeScript on the frontend, paired with Go on the backend and relational databases (MySQL/PostgreSQL). Proven practical experience through an internship at Telkom Akses and several self-directed fullstack web projects, complemented by a background in Android and machine learning from Bangkit Academy. Actively seeking fullstack web developer roles.

EXPERIENCE

Telkom Akses Area Sulbagsel — Makassar, Indonesia

Sep 2024 – Dec 2024

Web Developer Intern

- Developed a web-based platform to facilitate the uploading of PR-PO (Purchase Requisition) documents, streamlining the administration process.
- Optimized material request submissions and status updates between partners (mitra) and the internal team.
- Tech Stack: Next.Js, React.js, Firebase, Web Development, Git.

Hasanuddin University (Thesis Project) — Makassar, Indonesia

Jun 2025 – Jan 2026

AI Researcher & Data Analyst

- Architected an end-to-end NLP pipeline to analyze e-commerce behavior, focusing on multi-label drug classification and anomaly detection.
- Fine-tuned the IndoBERT model to process Indonesian text data, achieving optimized accuracy in categorizing complex medical product labels.
- Analyzed temporal data patterns from 2020–2022 using Isolation Forest, validating detected “panic buying” spikes against Google Trends and historical news events.
- Tech Stack: Python, Hugging Face Transformers, Scikit-learn, Matplotlib, Natural Language Processing (NLP).

Bangkit Academy led by Google, GoTo, & Traveloka — Indonesia (Remote)

Feb 2024 – Jul 2024

Mobile Development Cohort

- Collaborated in a cross-functional team of 6 (Machine Learning & Cloud Computing) to build an Android app capable of identifying skin diseases from images.
- Engineered the mobile frontend using Kotlin and XML/Jetpack Compose, implementing MVVM architecture for clean code structure.
- Built an intermediate-level “Story App” integrating the Retrofit library.
- Tech Stack: Kotlin, Android SDK, Retrofit, Git, MVVM Architecture.

PROJECTS

Travel Planner — Realistic Itinerary & Route Optimization System

Personal Project

- Built a full-stack trip planner that validates whether a daily itinerary is realistically achievable, rather than just storing schedule data.

- Implemented nearest-neighbor and 2-opt algorithms for destination ordering, combining fast Haversine estimation with OpenRouteService's Matrix API for route-verified results.
- Integrated OpenRouteService to calculate real travel times between scheduled activities and automatically flag schedule conflicts, workload overload, and unreachable routes.
- Tech Stack: Go, PostgreSQL, Next.js, TypeScript, Leaflet.

AQI Dashboard — Real-Time Air Quality Monitor

Personal Project

- Built a real-time air quality dashboard for cities across Indonesia to demonstrate concurrent programming in Go using goroutines, channels, and sync.WaitGroup to fetch data from multiple locations in parallel via the WAQI API.
- Designed partial failure handling so that a failed fetch for one city does not affect the display of data for other cities.
- Built an interactive map (Leaflet) with color-coded AQI markers and per-city pollutant breakdowns.
- Tech Stack: Go (standard library), Next.js, TypeScript, Leaflet.

Product Management System (CRUD)

Personal Project

- Built a product management web application implementing full CRUD (Create, Read, Update, Delete) functionality using the MVC architecture.
- Applied Laravel clean code standards and best practices for maintainable, well-structured application code.
- Tech Stack: Laravel 11, Tailwind CSS v4, Blade, PHP.

EDUCATION

Universitas Hasanuddin — South Sulawesi, Indonesia

Aug 2021 – Jan 2026

Bachelor of Informatics Engineering, GPA 3.70/4.00

- Developed a digital library website for the Programming Based on Project final course.
- Designed high-fidelity UI/UX mockups for the Human-Computer Interaction course final project.
- Built a responsive landing page for the Web Programming course project.

ORGANIZATION EXPERIENCE

Himpunan Mahasiswa Informatika FT-UH — South Sulawesi, Indonesia

Apr 2022 – May 2023

Treasurer

- Managed the organizational financial flow, overseeing expenses and income for HMIF FT-UH.
- Prepared comprehensive financial accountability reports for institutional evaluation.

SKILLS & ADDITIONAL INFORMATION

Technical Skills — Fullstack Web: React.js, Next.js, TypeScript, JavaScript, Go, Laravel, Tailwind CSS, HTML/CSS, Firebase

Technical Skills — Data & Mobile: Python, Java, Kotlin, Android, SQL (MySQL, PostgreSQL), Machine Learning, OOP, Git, Docker, Microsoft Office

Soft Skills: Growth Mindset, Time and Energy Management, Leadership, Public Speaking, Problem Solving, Analytical Thinking, Communication

Interests: Web Development, Artificial Intelligence, Mobile Development

Languages: Indonesian (Native or Bilingual), English (Professional Working)
